**APPLICATION FOR 30-DAY TEMPORARY POWER**

The issuance of a 30-day temporary power permit is governed by the conditions of SFBC 307.5 and SFBC 4501.3(c)(3). The usage of this electrical power is for building construction operations and testing purposes only. It is understood that any use of the power, without a Certificate of Occupancy, for occupation of the building will result in disconnection of the service.

This permit is for a period of thirty (30) days and must be renewed if a Certificate of Occupancy is not completed in this 30-day period. Temporary power will only be granted for two 30-day periods unless there exist special conditions. These special conditions must be outlined in a letter to the Chief Electrical Inspector and indicate the projected date of the Certificate of Occupancy. This letter must be approved by the Chief Electrical Inspector before the first 30-day application is submitted.

This 30-day temporary power permit is being issued for the property listed below:
